PROFESSIONAL SUMMARY

Artificial Intelligence student with hands-on Python development experience and a focus on data analysis and machine learning. Developed ML Forge Studio Pro, a macOS-oriented educational desktop application featuring 344 practical code examples across 69 AI and data science categories, with Arabic explanations. Seeking an internship to apply and expand skills in real-world data and AI projects.

EDUCATION

Delta University for Science and Technology

Faculty of Artificial Intelligence | Expected graduation: 2028

TECHNICAL SKILLS

Programming: Python

Data Analysis: Pandas, NumPy, data preprocessing

Machine Learning: Scikit-learn, model development fundamentals

Desktop Development: Tkinter; packaging with PyInstaller

Other: Code organization, Arabic technical documentation, GitHub

SELECTED PROJECT

ML Forge Studio Pro | Python Desktop Application

- Built a searchable reference library of 344 Python code recipes organized into 69 AI, ML, and data science categories.
- Added Arabic explanations and concise "what this code does" descriptions for every recipe.
- Developed a Tkinter desktop interface with category navigation, code copy, and .py export functionality.
- Prepared macOS application build and installation scripts using PyInstaller.

COURSES & CERTIFICATES OF COMPLETION

Huawei ICT Academy - HCIA-AI V4.0 Course | Aug 2026

Huawei ICT Academy - HCIA-Big Data V3.5 Course | Aug 2026

AI-Bdaya Engineering Masterclass - 60-hour AI/Deep Learning course

Cisco via Coursera - Security Operations Center (SOC) | May 2026
